found this relaxing and stress reducing to play. Very easy and uncomplicated sometimes you want that.. Look I can understand if your potato can only run this, then you feel the need to play it, but other than that, no fun factor, repetitive, terrible UI, Even if you got the Promote Pack for free, which is so overpriced if otherwise I would still not recommend this game. There are many more free to play games out there which will give you much more rewarding fun. Don't waste your time. If you have a PC that can run anything else, stick to anything else. Seriously stay clear from this title. I'm still sitting with PTSD.. While miles better than their first Sherlock Holmes game, this second outing is still not good. The plot's a bit of a jumble, and the items you have to find far too hidden. There's also no first person option, so most of the game is spent watching Holmes walk slowly around the large areas.

Frogwares gets better though! In fact every game after this is well worth playing, even the silly Hound of the Baskervilles.. I recommend this game with reservations.

It has some very cool things going for it. First off, if you are a fan of board games (like me) then this definitely scratches that particular itch, most of the time. There are a handful of levels in the story mode that are distinctively puzzles - that is to say, you don't really roll the dice or draw cards but rather attempt to play the dice and cards that you are prescribed in the correct (and only correct) order to succeed the only way possible. These levels, for me, are the weakest part of the game. Yes, there is satisfaction from figuring out the solution - and you will have to figure it out, the game isn't big enough to be able to find any walkthroughs for - but the frustration begins to set in quickly when you realize that you want to play a tabletop board game, not a puzzle.

Also, the RNG is often unfair. Now, let me clarify that I LOVE randomness in games. My favorite board games are Ameritrash style (Camp Grizzly, Fortune and Glory, Marvel Legendary, I could go on and on) and my favorite pen and paper RPGs are ones with random character generation (Heroes Unlimited, TMNT, well, anything old-school Palladium) so I am not at all one of those people who screams with rage every time he sees a game with RNG elements. However this game does sometimes take it a little far. Example: I was once tasked with killing two enemies who start out in the same room as each other on the opposite side of the map from me. After ten or so failed attempts I just happened to start the game with a Sentinel card in my hand. I placed a Sentinel in their room. Bam, two dead enemies in one round and I never had to leave my starting square. There were other times that the RNG had a similar sort of play against me. And as much as I love randomness, it is simply not fair to win or lose before you (or your opponent) even get to make a turn.

Finally, the voice acting is tolerable, but the voice casting is atrocious. And if you don't know the difference, imagine if Bobcat

Goldthwait had been cast as Groot. Sure, he could have said the lines, but it would have sounded ridiculous. I have the same problem here - Sajatir in particular just sounds silly.

Now, I have bashed the game on three separate criteria, but recognize that both the first and third issues only affect Single Player Story Mode, and frankly, board games like this are never as fun unless you're playing with friends. Also, both are small issues. I can overlook some bad voicing especially since you only hear the voices during the between-mission cutscenes. I can overlook some puzzle missions since they are not the majority. And while some will never get over the RNG issues, they were not enough to kill my entertainment completely.

So, if you are a fan of board games and tactical games that require you to rethink strategies on the fly to deal with random elements, then this game is definitely worth picking up.

. awesome physics game really fun to blow stuff up. i love it. :D

i would buy it if you dont have it. its a awesome game its worth your 10 bucks :D. One of those really really hard platformers. You'll die a couple hundred times throughout the game, but fortunatly your corpses persist after death, so things get a little easier the more you die in a particular section, because you can (for instance) plug up all the pointy spikes with dead versions of you.

It's otherwise a mix of features to keep it interesting, some areas are about precision, some are about moving quickly, some are physics-based puzzles - but you're going to die in droves in all of them, and that's alright too.

Essentially Super Meat Boy on steroids.

This game has a bit of a Anthem feel to it, it definitely has allot of potential and room to grow! Only thing we noticed was the servers were really laggy aswell as the frame rates at some points.

Other than that it was a enjoyable game!

This was our very first match playing, had no idea what we were doing so we just went with the flow and scored a win!. In my opinion, the game is not bad.

Despite the art and script might be a little off, but i like the idea of the VN game unlike other.

:3. Overlooked little game with bomberman esque feel. Co-op is fun and the puzzels are not mindlessly easy. Great game to have in your library for a rainy day!. I like this game. Of course game is not working. Im spoiled by GOG and automatically expect old games working without problem. Just do not buy any game on steam older than 10 years.. This is, without a doubt, the most fun you can have while screaming the lyrics to a MIDI version of Starship's 'We Built This City'.

10V10, will be thinking about Lightmare in my sleep again.. Love it! It's hard but never felt unfair and has good replay value so far. Would definitely recommend!. Bring friends, watch them play this, laugh at their misfortune.. In spite of its severe lack of bees, Nova Flow delivers strongly in all other aspects.

Thrown straight into the action with just enough tutorial direction to get you started, the gameplay allows for multiple approaches to each level, ranging from straightforward to absolutely bizarre.

The difficulty and level design feel consistently fair, with some large, but entirely overcomable difficulty spikes in the later levels that bring a sense of pride and accomplishment not seen since EA's Star Wars Battlefront II.

The music fits the fast-paced neon retro theme of the game perfectly, with some of the tracks being more than catchy enough to be stuck in your head all day.

Great game, especially for the tiny price tag.

10V10 would go fast again.
